

# Bob & Margie Langley from Kansas

**1** Lowell, I filled up for the 3rd time Friday night. The old truck (1995 Ford F-350 with a 7.3 Turbo-Diesel) is doing better all the time. As you know I used to get 15 MPG before the pills and now I just got 19 MPG!!! I think it is making gas! I put the cap on tight so it doesn't start running out on the ground. HA! HA! Now that my old truck is hooked on the pill, I will have to be a pill pusher too, just to support the old truck's habit. -- **Bob and Margie Langley, Kansas**

P.S. This is Margie and I am equally as excited as Bob is. I believe with all my heart that this is going to get us out of the "rat race" and make more time for us to do what we feel that God has put in our hearts to do. I am checking my mileage and will start using the pill in my car next week when I gas up.

Margie

P. S. S. Oh no! Her car will be hooked too!!

Bob

**2** "It's a beautiful day here in northern Illinois and I'm doing well with the "pills". My 03 Avalanche has gone from about 13 mpg to right at 17 in city driving (30% savings!!) and 17.9 up to about 21 on highway. My wife's Focus has risen nearly 25% after two tanks in city-only driving. Thanks for a great product!!! Keep me informed of your progress in the marketing and the BIG ANNOUNCEMENT!!!" --**Bob Stouffer, Illinois**

**3** My savings at the pump is almost 19%!! What does that mean since I still take the same \$52.00 to \$53.00 to fill up? Well, since I'm going further, it means that my cost to go the same distance before the pills is now only \$43.12 with the pills. That's a saving of just about \$10.00 per tank less the \$2.00 for the pills/powder. NOT BAD!!!" ---**Bob Grayson, Delaware**

**4** "STOP THE PRESSES!!! Lowell, if you thought I was excited yesterday with my 19% savings - wait until you get a load of this. On my long drive from Florida back to Delaware, using the powder, I tried an experiment. I slowed my cruise speed from between 70-75 mph down to 65. My mileage shot through the roof - I couldn't believe it. In the past two days, I have gone from 20.7 mpg to 25.5 mpg - NOW up to 29.5 mpg. I'm getting over 500 miles per tank. Using my formula - that's almost a 30% savings at the pump. How good is that? So - below is my order for 400 PILLS!!!" --**Bob Grayson, Delaware**

**5** "Hello Lowell, I just wanted to touch base with you on the gas pills. My mom, Carolyn Carter and I discussed purchasing these pills for a little while. I'll admit, I am some what of a skeptic....I just knew it was a hoax. However, I did purchase the pills. The first time I used the pills I noticed I did seem to get better gas mileage. With the 4th tank of gas I noticed, I kept driving & driving on the same tank. When I finally filled the tank, I had driven 392 miles. That is about 50-55 miles further than I had been able to drive prior to using these pills!!!" ---**Karen Winters, Texas**

**6** We just returned from a 2,600 mile trip. When we started we got 11 mpg and now we're up to 16 mpg using the pills which we believe is awesome for a conversion van!! When it comes to in-town driving we used to have to fill up once a week with all the driving we do with the kids. Now, since we started using the pills it's about every week and a half!!" --**Aaron & Angela Collins, Wisconsin**

**7** "I drive a 2005 Toyota Solara. I normally get 22 mpg in the city. On my last fill up using the powder, I got 33.2 mpg in the city!! I love the powder, and wouldn't be without it! Also, I always have to fill up every 5 - 6 days, but I was able to go an extra 3 days and fill up on the 9th day! I got a 51% savings on mpg and on number of days!!!! My husband is a retired minister, and the savings we are receiving from this product is a huge blessing

to us. There is no doubt about it, this is a miracle product. Try it, you won't like it--- You Will Love It!!!!" ---  
**Miriam Yeager, Oklahoma**

**8 Pastor from Wisconsin reports...** "I just got back from a conference in El Paso, TX. Before I left, I filled up my tank and gave it's first booster. My wife drove my truck Mon-Wed taking our grand kids to school and back. Last night I drove to Milwaukee to pick something up, and I still have a little over half a tank left. I'm not meticulous about keeping mileage, but I know I should have less than half a tank left. Looks like the pills are working!"

**9 "I'm getting an additional 100 miles per tank using the gas pills. I calculated my gas mileage, and it has increased from 13+ mpg to over 18 mpg!!! That's in my 6,000 + Lb. truck!" --Bob Smutek, New Cork**

**10 "I'll give you a knock your socks off testimonial. OK, I'll admit it. I was skeptical. I have a gigantic Yukon Denali and this thing sucks gas like there's no tomorrow. I put 30,000 miles on it the first year I had it and 6,000 miles the 2nd. What does that tell you? At 13.6 mpg, who can afford to drive it? It cost me over \$70.00 to fill up the tank a few weeks ago and it's gone in 2-3 days. I hoped these magic pills would work, but honestly, I wasn't holding my breath. My Denali is equipped with a trip computer, so it's pretty easy for me to tell what is going on with the mileage. It provides me with instantaneous range figures that don't lie. I gassed up on the way home to the tune of \$53.00, dropped four pills into the funnel I bought, then went out to dinner, picked up the kid at the in-laws, and drove back home, about 60 miles or so. When I got about 5 miles from home I happened to look down at the "Range" counter, just out of curiosity. It read 379 which I found strange. I am used to looking at this when I fill up and it never read more than 352 before. So I thought to myself, hmmm . . . I just picked up an extra 27 miles on this tank from these pills. Not bad I suppose.**

Then it dawned on me . . . I didn't add the 60 miles I had already driven! It appears that I have already seen an additional 87 miles out of one tank of gas!!! But wait, there's more to the story. While I was driving home, the range counter was changing which is normal. I usually watch this giant gas sucking machine suck up the fuel like no vehicle I have ever had. Well, I'm a little embarrassed to admit it, but the range counter was not going down like it always does, it was going up!!!! By the time I got home, it read 381!!!! I am dead serious. This is not a joke. So I'm up to over 90 additional miles and I still have another 380 miles range to drive. Will it keep increasing? Am I crazy or does this stuff really work? I called a friend immediately and we began laughing about my new found fortune. Any guess what he wanted to know? Where do I get mine!!! Tomorrow I am dropping some more pills into my 4 Runner. I get about 18 mpg now, but I'm guessing that's about to go up. My family spends about \$600 a month on gas, so if I can cut it to \$400 or so, I can afford a new car!! Probably a Honda Civic!! Or a Hummer! Gas prices? Bah humbug!! Thanks for the blessings." --**Bob Ulrich, Oklahoma**

**11 "I have a brand new 2005 Chevrolet Silverado Pick-Up Truck, and I got a 23% savings on my 2nd tank of gas using the pills!! On my first tank I got 12.75 mpg, and on my 2nd tank I got 15.78 mpg." --Gary Spivey, Virginia**

**12 "I got 2 mpg better on the first fill up using the pills. I can have 100s of people involved in a short time." Bob is now receiving a 20% savings on his 2nd tank using the pills as he continues to report..... "I put the pills in a 1995 Ford F-350 with a 7.3 Turbo-Diesel. I filled up for the second time tonight and it got almost one more mpg. Up from 15 mpg to almost 18 mpg!!" Bob is now on his 3rd tank and continues to report... "My truck is old and has a lot of miles on it. In addition to a 20% savings and I am not even through my 3rd tank yet using the pills, I have had a big improvement in performance. It is starting better, it accelerates much better and over all performance is better. The old truck is running better than it has since I have owned it. Even if I didn't get a 20% savings, I would still use the pill just for the added performance. Its great!! --Bob Langley, Kansas**

**13 "Upon leaving on a road trip, I used pills going, but on my way back, I had no pills left. It took ¾ of a tank more on the way back, with no pills, than it did going. That is more than 25% savings!" --Cinthia R., Texas**

**14** "I have gone 275 miles on half a tank of gas.... I can't believe it!! I normally get 23 miles per gallon, but I am getting well over 30 now!!!" After his 4th tank of using the pills, Billy continues to report, "Now, after 4 tanks of using the pills I am getting 32 mpg. That's a 40% savings!! I have never seen or experienced anything like this in my life! My wife and I praise the Lord everyday for this product!!! --**Billy Thomas, Georgia**

**15** "I got an 18% savings just on my 2nd tank of gas using these pills!!!! These gas pills are absolutely INCREDIBLE!!! Easy to use... and THEY WORK!!! I will never again be without these pills!!!! Imagine how much I will be saving by my 4th tank when I reach my maximum savings!!! I'm telling every person about these pills, because it's a no-brainer.... Every person will want these pills!" --**Carolyn Carter, Indiana**

**16** Just a few words to thank you for letting me try your "fuel reducing expense pills." I own a 2001 6 cylinder Ford Explorer that used to run for 355 to 360 miles per tank. After using the pills the tank lasts for 400 to 420 miles, which is a 18% savings! I will continue using them on a regular basis. I am so excited when I am fueling and dropping the pills into the tank; I feel as if I am the most intelligent guy at the gas station; as if I had a secret that is of my own! I will encourage all my employees, friends and relatives to use them. Thank you again!" --**Rafa Vilaclara, Texas**

**17** I drop one pill, cost \$1, in my gas tank per fifteen gallons of fuel and save \$\$\$\$. Optimum gain is 35% or better after the fourth tank of gas. Some have reported a 37% increase in gas mileage. I'm only on my second tank of gasoline using the pill. I went from 23 highway miles to the gallon to 25 highway miles to the gallon. That's nearly a 10% gain. If my mileage doesn't improve any, I'm already ahead of the game. One pill @ \$1 is carrying me 30 miles further per 15 gallons of fuel. That's a savings of 1.2 gallons of gas. At \$2.70 per gallon, I'm saving \$3.24 for the cost of \$1. That's a 300% return on my buck. That makes this a no brainer, folks." --**Karl Lewis- Deridder, Louisiana**

**18** "I have been using the pills in my 2001 Ford F150 for 2 months now and also on my lawn machines. I have been getting 25% savings per tank, and this includes me hauling a trailer with my lawn machines. I recommend using these pills! They really work!! " --**Rafael Frias, Texas**

**19** "I drive a 2002 LTZ Trailblazer 4x4. I received a 12% savings on my 1st tank of gas using the pills and I am now up to 25% savings!! Before using this product, I was getting 280 miles per tank, and now I am getting 70 miles more per tank, which is a total of 350 miles per tank. It doesn't take a rocket scientist to know that EVERY human in America will want this product!!!! I'm more than ready for the BIG ANNOUNCEMENT coming in a few weeks!!!!!! I'M EVER READY!!!!!!" ---**Ken Williamson, Alabama**

**20** "I just did my first tank in my wife's car, the Lexus RX300 SUV. We got 20.9 on the highway without the pill. We got 23.04 using two pills!" --**Bob Sims, Texas**

**21** **NEW TESTIMONY JUST IN.....** "This stuff is totally amazing. My 98 Avalon was getting 24 mpg before the pill, now I am getting 29 mpg after 4 tanks with the pill. I can't wait for this company to launch! I am going to be one of those 1,000 millionaires, so watch out everyone!! Thank you so much for bringing this product to us. The time is right!" --- **Frank Paris, Tennessee**

**22** Before BioPerformance Fuel....21 miles per gallon. First tank full using BioPerformance Fuel - 25.8 miles per gallon. Second tank full using BioPerformance Fuel - 27 miles per gallon." ---**John Peregoy, North Carolina**

**23** "I did another mileage test while traveling to one of our son's for Thanksgiving. Before using the product, we were getting 26-28 mpg on our 99 Malibu, this was a 160 mile trip and we got 33 mpg! We got a 20%-30% SAVINGS!!! The fuel tablets are really remarkable!!" --- **Pastor Warren Harkins, Oklahoma**

**24** "On my 4th tank of gas using the gas pills in my Buick Park Avenue, my mpg shot up to 29.5 from 24 mpg!! That's a 25% savings!! I don't know how they work, but I know first-hand these pills work just from using them! It's like electricity, you don't know how it works, you just know it works when you turn the lights on. You don't know how these gas pills work, you just know they work when you put them in your tank, and they are so easy to use! I LOVE USING THESE GAS PILLS!!" ---**Danny Johnston, Virginia**

**25** I used to get 16.8 mpg before using the gas pills, and now his diesel truck is getting 22 mpg!!! That's about a 33% SAVING!!! And... this was just his 2nd tank of gas using the pills!!!! **Scott Chandler from Alabama**

**26** "I just did my 4th consecutive, complete tank using the product in my wife's car, the Lexus RX300 SUV. We got 20.9 mpg on the highway without the pill. We got 25.26 mpg on our 4th tank. That's over a 20% savings! This speaks for itself." --**Bob Sims, Texas**
